

Water Distribution Division

Division Overview

The Water Distribution Division emphasizes maintenance and improvement of the Town's water system, with the continued gradual change out of older water meters. To allow for the proper flushing of lines, staff spends time locating and repairing original "blow-offs" on dead end lines. This Division is also responsible for the disconnection of water meters due to, for example, storm damage, leaks, or non-payment. Staff also installs water taps, repairs or installs water lines, and locates water mains for contractors and utility companies.

Although the Water Distribution function is placed under the Public Works Department, for control and administrative support purposes, this Division falls in the Water Fund, primarily because funding comes from revenues generated from water customers.

Goals

To continue to provide superior customer service through prompt responses to customer needs, and efficiently and accurately reading the towns meter routes. To distribute water of equal quality and pressure and to provide adequate fire flows within the Town's water distribution system that exceed state and federal guidelines.

Objectives

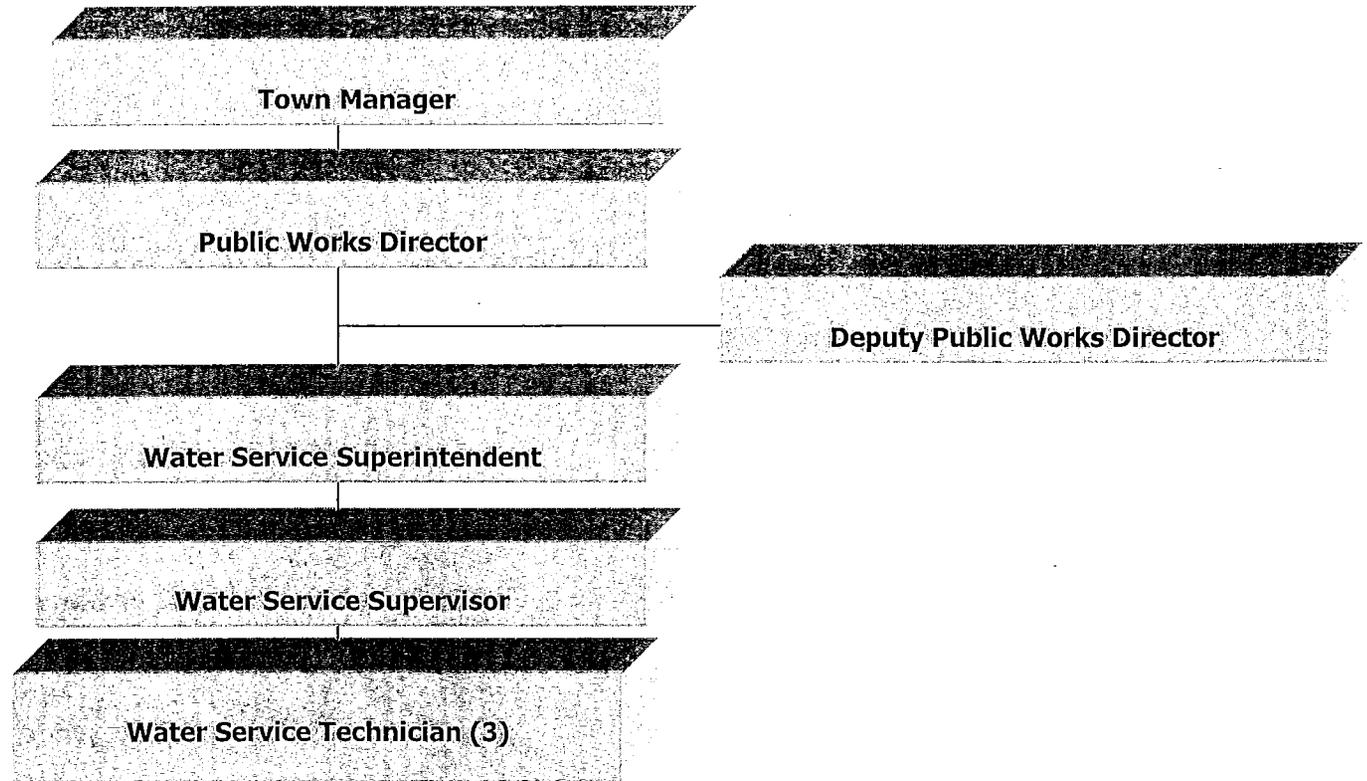

- Employ and thoroughly train, efficient, and conscientious personnel to maintain the water system to provide a safe and reliable product.
- Continue the meter change-out program in order to remove meters over 20 years old to ensure the accurate measurement of water consumed by our customers and to retrofit the system with approved back flow protection as funds and personnel allow.
- Follow the time schedule for water main improvements as outlined in the water master plan as funding permits.
- Provide a looped system where dead ends exist as well as continue to install automatic flushing devices in areas directly affected by seasonal flows and demands (or the lack of), or on dead end lines not feasible to loop, to improve water quality and provide adequate fire flows as the budget allows.
