

# ***Public Works Department***

## **Department Overview**

The Public Works Department consists of six divisions: Administration, Public Facilities Maintenance, Fleet Maintenance, and Sanitation, which are discussed below and Water Operations and Water Distribution, which are discussed in the Water Fund section of this budget. A seventh division, Stormwater Management, has a separate operating budget but no assigned personnel. Public Works Administration provides departmental coordination, technical assistance, and support for the Department. Administration also manages citizen complaints; oversees budget preparation; generates all Department contracts and monitors the contract approval process; provides expenditure control; coordinates the expansion of the Town's waste diversion efforts; conducts studies and prepares reports; manages record keeping; provides coordination of personnel evaluation, discipline, safety, training and outfitting; and acts as a liaison to other departments.

## **Public Facilities Maintenance Division**

Public Facilities Maintenance maintains the overall appearance and cleanliness of the Town's facilities and grounds and provides efficient, cost-effective general maintenance and repair of Town-maintained streets and rights-of-way. Additional responsibilities include asphalt and concrete repairs, roadway sweeping, Multi-use Path maintenance and cleaning, street sign installation, specialty street pavement markings, storm drainage installation and maintenance, right-of-way mowing, vegetation trimming and removal, and hauling and grading duties as required. Finally, this Division maintains 47 public oceanfront and soundfront accesses.

## **Fleet Maintenance Division**

Fleet Maintenance maintains, repairs, and services all Town vehicles and heavy equipment. Efficient, cost-effective maintenance of this equipment is essential to providing uninterrupted service to Nags Head residents and visitors. The Division also performs preventative maintenance on vehicles through careful operation, timely servicing, systematic inspection, and detection/correction of potential equipment problems before a major breakdown occurs. Successful equipment maintenance allows the departments to carry out their duties in a timely and cost-effective manner. In recent years, major vehicle rehabilitation to increase service years has been successfully added to their responsibilities. This division also maintains the Vehicle Replacement Schedule to insure vehicles are not kept beyond their economical operating life.

## **Sanitation Division**

Sanitation collects commercial and residential refuse in Nags Head. The division also provides vegetative debris chipping and mulching services in addition to collecting recyclables. Recycling containers are located at beach accesses, at the Municipal Complex site, and at various sites throughout the community. Commercial cardboard and glass collection is also provided. Bulk materials are picked up on request from October 1 through April 30 each year. Also, a bulk drop-off site located across from the Public Works complex on Lark Avenue is open 24 hours per week throughout the year for all types of bulk items.

**Goals**

To provide essential and desired public services, including quality customer service, to Nags Head citizens, property owners, and visitors that will ensure their well being, improve their quality of life, and promote a positive atmosphere for continued economic development. These services are to be provided in a flexible, cost effective, customer friendly and environmentally sensitive manner.

**Objectives**

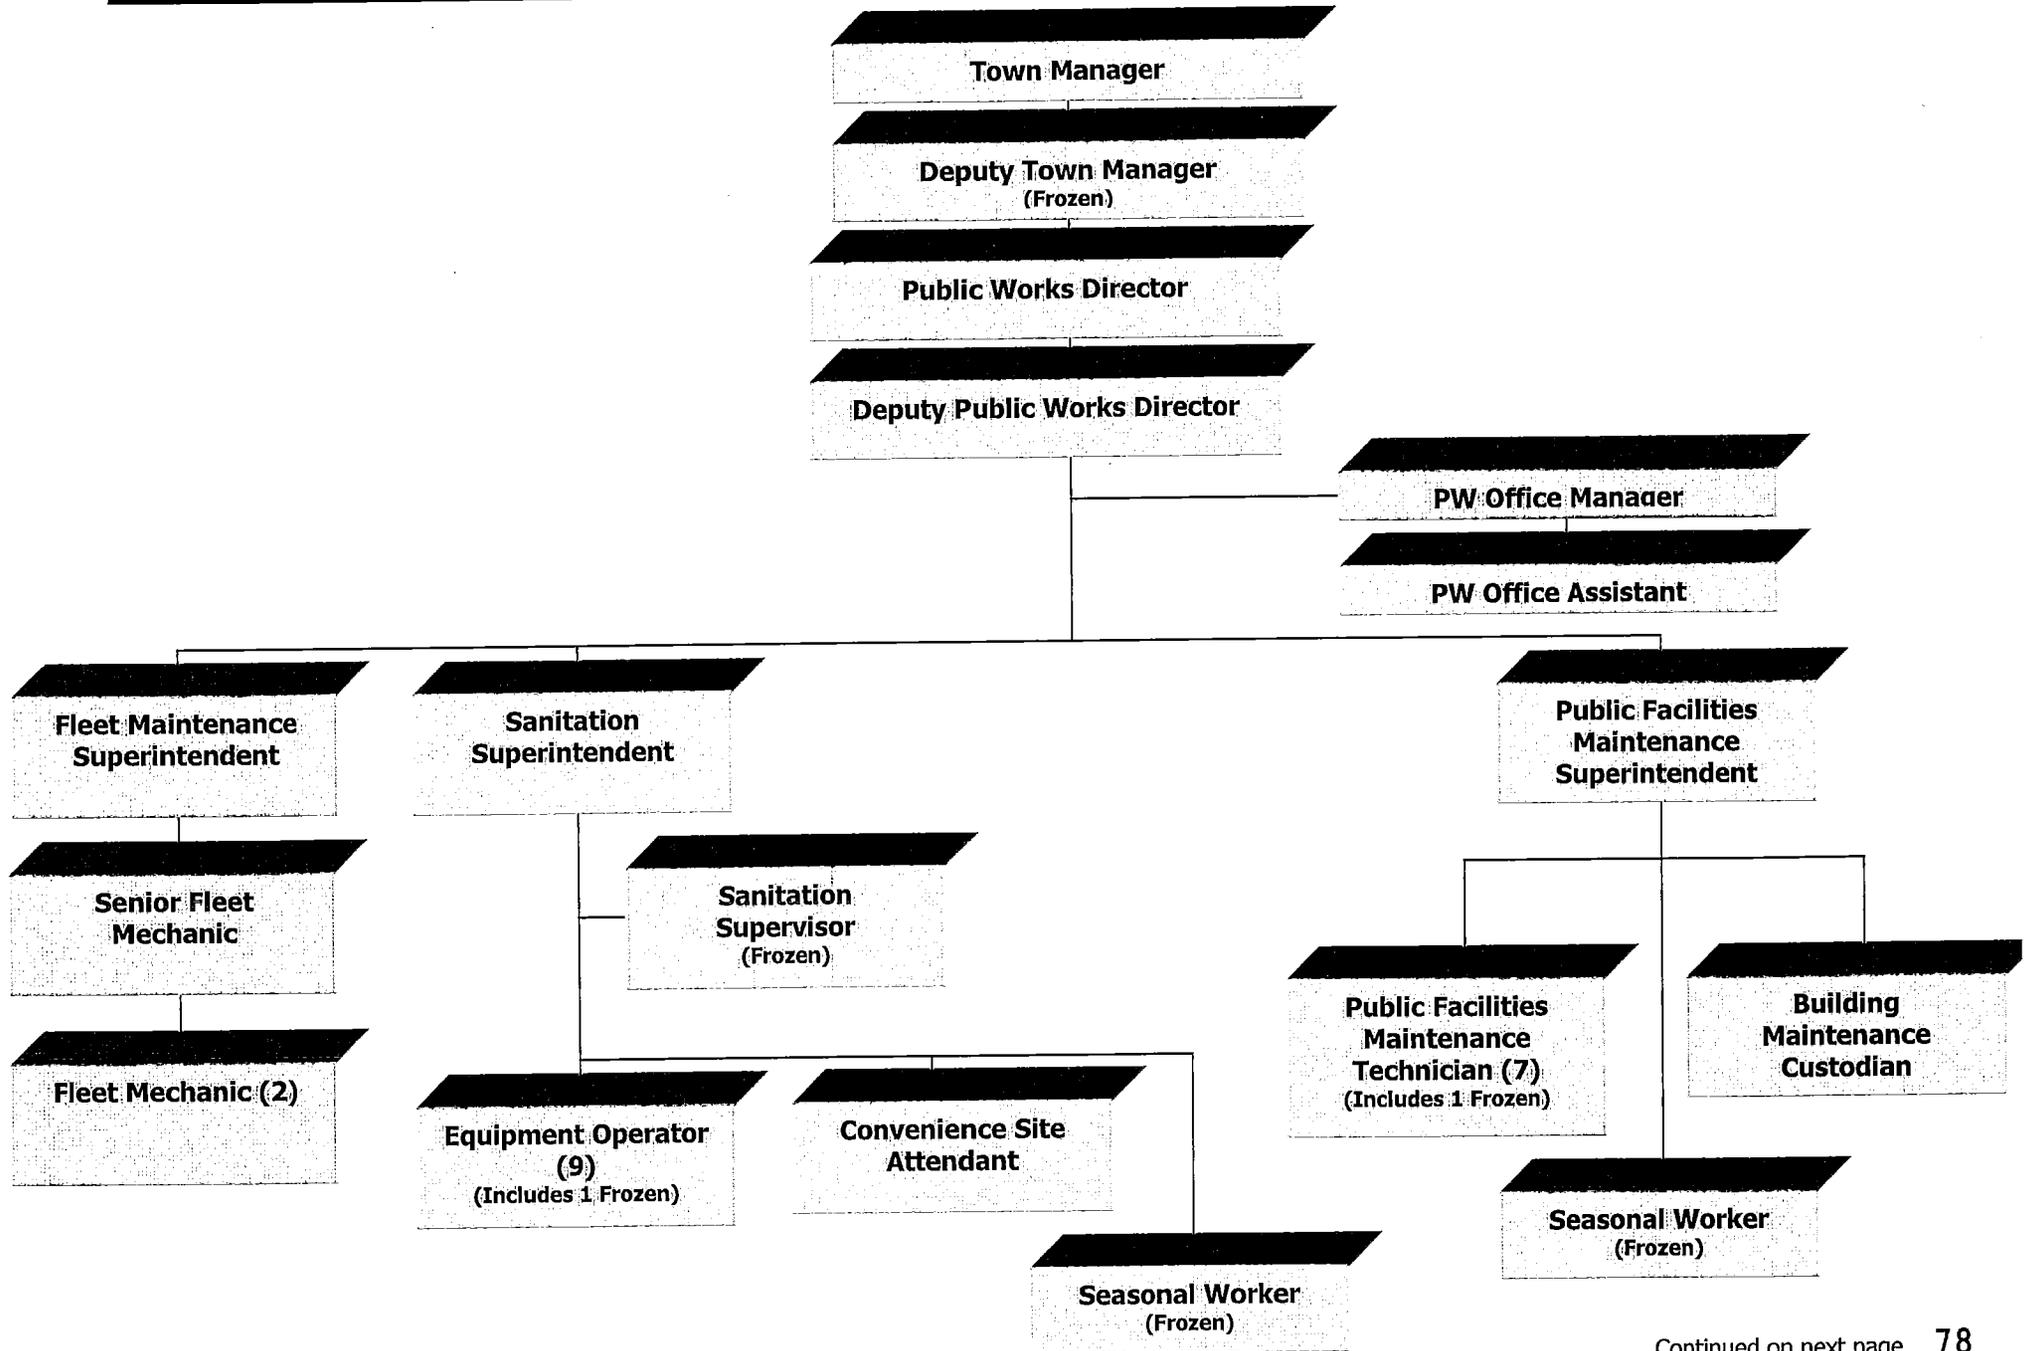

- To provide the most effective and economical methods for collection, recycling, and disposal of residential and commercial solid waste.
- To efficiently maintain all Town owned buildings, grounds, oceanfront and soundside accesses and facilities in a timely manner that ensures the safety of those using these facilities, as well as their long term viability and appearance. To seek grant funds to replace aging facilities and construct improvements (parking, showers and bike racks, for example) to maintain the Board's value of providing public beach and sound access and public parking.
- To manage stormwater in the most cost effective and environmentally sensitive manner to reduce flooding and protect the environment. This will be accomplished through the ongoing development of the Stormwater Utility. Activities to be accomplished by this utility will include construction, maintenance and repair, treatment where appropriate, education and stormwater studies, and continued implementation of the updated Town Stormwater Management Plan, and Stormwater CIP.
- To efficiently maintain all Town streets, shoulders, sidewalks, multi-use paths, rights-of-way landscaping, signs, and drainage facilities including the improvement of all streets to current Town standards or other standards as appropriate.
- To properly and efficiently maintain all Town owned vehicles and motorized equipment to guarantee availability, long-term viability, safety and cost-effective operation.
- To implement Public Works and Water Fund capital projects in a timely manner to improve the Town's facilities in order to better serve the public.
- To provide effective leadership and support for all divisions of Public Works, including maintenance of an adequate parts inventory and fuel supply, continual safety training, and emphasis on compliance with all applicable OSHA requirements.
- To provide assistance to other Town departments to enhance their ability to provide service to the public and internal customers.

**Performance Objectives and Workload Indicators**
