Please share what interests you about septic health:	Understanding our challenges and making sure we can educate home owners and work toward finding long term solutions to ensure sustainable septic health in our community. I also run a remodeling / repair business and I frequently encounter home owners that are just not aware of how important it is to ensure they have their systems inspected and maintained properly. Many of them don't really understand how it's different from their homes with connected sewer systems at their primary residence off the beach.
Are you able/willing to attend four committee meetings per year?	Yes and more if needed.

Please share what interests you about septic health: I am a prior committee member that assisted with the current update of the SHI. Would like to see the maturation of recent changes we made. As an environmental chemist, I want to be protective of the health of our community and our natural resources.
