

## PWS Information

**Purpose of this worksheet:** For water systems to document basic system information.

### Facility Information

Water System Name:

**TOWN OF NAGS HEAD WATER**

PWSID: Please enter using the format "NC0011222"

**NC0428010**

Population Served (number of people):

**3,125**

Number of Service Connections:

**5,041**

PWS Type (select one):

Community Water System

If you are a CWS, do multi-family residences comprise at least 20% of the structures you serve?

*No*

### Mailing Address

Street or P.O. Box:

**P.O BOX 99**

City or Town:

**NAGS HEAD**

State, Zip Code:

**NC, 27959**

### System Contact Person

Name:

**RAYMOND SCHOONMAKER**

Telephone:

**252-305-6425**

Title:

**WATER DIST. SUPERINTENDENT**

# Inventory Methodology

PWS Name: TOWN OF NAGS HEAD WATER

PWSID: NC0428010

Enter Date Last Updated:

09/10/24

**Purpose of this worksheet:** For water systems to document the methods and resources they used to develop and update their inventory.

## Part 1: Historical Records Review

Describe the Records Reviewed for Your Inventory and Indicate Your Level of Confidence ( e.g. , Low, Medium, or High). Historical records are required to be part of your service line inventory. If you do not have the record described, please indicate this.

### 1. Previous Materials Evaluation

Example: Locations of Tier 1 lead tap sampling locations that are served by a lead service line.

**High - original system build materials list, affidavit of previous head of the water system, county tax records**

### 2. Construction Records and Plumbing Codes

Examples: Local ordinance adopting an international plumbing code. Permits for replacing lead service lines.

**Low - NA**

### 3. Water System Records

Examples: Capital improvement plans. Standard operating procedures. Engineering standards.

**High - original system build materials list**

### 4. Distribution System Inspections and Records

Examples: Distribution system maps. Tap cards. Service line repair/replacement records. Inspection records. Meter installation records.

**Low - NA**

### 5. Additional Records Required by Your State

**Medium - NA**

### 6. Other Records

Medium - NA

**Part 2: Identifying Service Line Material During Normal Operations**

1. During which normal operating activities are you collecting information on service line material? Select yes or no for all.

Water meter reading

No

Water meter repair or replacement

Yes

Service line repair or replacement

Yes

Water main repair or replacement

No

Backflow prevention device inspection

No

Other

Yes

If "Other", please explain:

**we collected this information for the lead service line inventory**

2. Did you develop or revise standard operating procedures to collect service line material information during normal operation?

No

If "Yes", please describe:

**Part 3: Service Line Investigations**

1. Identify the service line investigation methods your system used to prepare the inventory (select yes or no for all). If a water system chooses an investigation method not specified by the state under 40 CFR §141.84(a)(3)(iv), state approval is required. **Note that investigations are not required by the LCRR but can be used by systems to assess accuracy of historical records and gather information when service line material is unknown.**

Visual Inspection at the Meter Pit

Yes

Customer Self-Identification

Yes

CCTV Inspection at Curb Box - External

No

CCTV Inspection at Curb Box - Internal

No

Water Quality Sampling - Targeted

No

Water Quality Sampling - Flushed

No

Water Quality sampling - Sequential

No

Water Quality Sampling - Other

No

Mechanical Excavation

Yes

Vacuum Excavation

No

Predictive Modeling

No

Other

No

If "Other", please explain:

n/a

2. If "Predictive Modeling", please briefly describe the model and inputs used:

n/a

3. How did you prioritize locations for service line materials investigations? For example, did you consider environmental justice and/or sensitive populations, did you use predictive modeling, and/or did you target areas with high number of unknowns?

**By age of building from tax records**

# Inventory Summary

PWS Name: TOWN OF NAGS HEAD WATER

PWSID: NC0428010

Enter Date Last Updated:

09/10/24

**Purpose of this worksheet:** For water systems to provide a summary of their service line inventory, including information on ownership and the number of service lines for each of the four required materials classifications.

## Part 1. General Information

1. Is this the **Initial Inventory** or an **Inventory Update**?

*Initial Inventory*

2a. Who **owns the service lines** in your system? *If other, please explain below.*

*Split ownership between the system and the customer*

2b. Is there documentation that defines service line ownership in your system, such as a local ordinance? *If yes, please describe below and explain where ownership is split (e.g., property line, curb stop).*

*No*

3a. Describe when lead service lines were generally installed in your system.

**Never installed**

3b. When were lead service lines banned in your system? Reference the state or local ordinance that banned the use of lead in your system.

**NC Lead Ban 1987**

4. Do you have lead goosenecks, pigtails or connectors in your system?

*No*

5. What is your overall level of confidence in the inventory (*i.e.*, "Low", "Medium", or "High.") Please explain your rationale below.

**High**

**LEAD HAS NEVER BEEN INSTALLED IN OUR SYSTEM. WE HAVE ORIGINAL RECEIPTS FOR INITIAL SYSTEM INSTALATION ALL LINES AND MATERIALS WERE COPPER. AFFIDAVIT FROM PREVIOUS SYSTEM SUPERINTENDENT STATING LEAD WAS NEVER USED IN SYSTEM**

## Part 2. Inventory Summary Table <sup>1</sup>

The classifications generated in the Column "Entire Service Line Material Classification" (Column X) from the **Detailed Inventory** will be used to calculate the total number of service lines for each of the four material classifications below.

**Lead:** Any portion of the service line is known to be made of lead.<sup>2</sup>

0

**Galvanized Requiring Replacement (GRR):** The service line is not made of lead, but a portion is galvanized and the system is unable to demonstrate that the galvanized line was never downstream of a lead service line.

0

**Non-Lead:**

5,176

**Lead Status Unknown:** The service line material is not known to be lead or GRR. For the entire service line or a portion of it (in cases of split ownership), there is not enough evidence to support material classification.

0

**TOTAL**

**5,176**

Notes

<sup>1</sup>This summary table is for reporting material for the entire service line connecting the water main to the customer's plumbing. See the **Classifying SLs** worksheet for additional guidance on assigning a materials classification to the entire service line when ownership is split. Remember that systems must track the system-owned and customer-owned portions separately in their inventory.

<sup>2</sup>A lead-lined galvanized service line is consistent with the definition of an LSL under the LCRR ("a portion of pipe that is made of lead, which connects the water main to the building inlet") (40 CFR §141.2) and must therefore be classified in the inventory as an LSL. Do NOT, however, count non-lead service lines with a lead gooseneck or pigtail as lead service lines unless required by your state.

# Detailed Inventory

PWS Name: TOWN OF NAGS HEAD WATER

PWSID: NC0428010

Date Last Updated:

9/10/2024

**Purpose of this worksheet:** To allow water systems to track materials for each service line in their distribution system.

Location Information		System-Owned Portion			Customer-Owned Portion	Entire Service Line Material Classification
Unique Service Line ID	Location Identifier  Street Address	System-Owned Portion Service Line Material Classification	If Non-Lead in Column G, Was Material Ever Previously Lead?	Service Line Installation Date	Customer-Owned Portion Service Line Material Classification	
A Unique ID is recommended for each service line.	Water systems must track addresses of all service lines in their internal inventory. For the publicly accessible version, location identifiers are required for lead and galvanized requiring replacement. If the system does not use addresses for their location identifier, other options could include GPS coordinates, landmark, intersection, block, or other details to specify service line locations.	Drop-down list includes recommended subclassifications. If "Non-Lead Other", describe in Notes field	Select Yes, No, or Don't know. <b>Used to determine if service line is galvanized requiring replacement .</b>	Date, year, or estimated date range when the service line was installed or replaced	Drop-down list includes recommended subclassifications. If non-lead other, describe in Notes field.	Auto-filled list includes four required service line classifications of Lead, Non-lead, Galvanized Requiring Replacement, or Unknown

# Public Accessibility Documentation

PWS Name: TOWN OF NAGS HEAD WATER

PWSID: NC0428010

Enter Date Last Updated:

09/10/24

**Purpose of this worksheet:** For systems to provide documentation to the state on how they met the public accessibility requirements of the LCRR.

1. Select the location identifiers that you use for your service line inventory. Select all that apply.

Address

Yes

Street

No

Block

No

Intersection

No

Landmark

No

GPS Coordinates

No

Other

No

If "Other", please describe:

2. Does **every service line** have a location identifier?

Yes

If "No", explain. Remember that location identifiers are required for service lines that are lead and galvanized requiring replacement.

3. How are you making your inventory publicly accessible? Check all that apply. Remember that if your system serves > 50,000 people, you **must** provide the inventory online.

Interactive online map

No

Static online map

No

Online spreadsheet

Yes

Printed service line map

No

Printed tabular data

No

Information on water utility mailings or newsletter

Yes

Hard copy information available in water system office

No

Other

No

If "Other", please describe:
